A McGraw-Hill Publication

Power

Plant electrical systems

Vacuum interrupters are finding a variety of new applications ..... page 17
Metalclad switchgear is made smaller, lighter and quieter ..... page 20
Vacuum units are suited to deep-well pumping, URD ..... page 22

Mechanical transmission and lubrication

Oil-cooled slippage highlights new variable-speed drives ..... page 26

Instrumentation and control

Link remote sensors with coaxial cables, leased telephone lines ..... page 28

Prime movers and generators

Turbines are making headway for fan drives and other auxiliaries ..... page 30
How to make final, precision alignment of transmission to engine ..... page 32

Steam generation

Simplify cost calculations for 100-2000-MW power plants ..... page 39
Variable-pressure boilers bring quick-starting, efficient peaking ..... page 42

Environmental management

Fluidized-bed combustion offers promise of reduced air pollution ..... page 46
Tackling nitrogen-oxide emissions from utility boilers ..... page 112

Fluid handling

Hydrostatic bearings remove instability from boiler feed pumps ..... page 62
Fiber-glass-reinforced plastic—specialist in piping problems ..... page 64

Heating and cooling

Evaluate plant concepts by system simulation with computers ..... page 67
Air cooling for condensation and exhaust-heat rejection ..... page 110

Editorial Index

Volume 114 January-December 1970

McGraw-Hill, Inc., 330 West 42nd Street
New York, N.Y. 10036

SUBJECT INDEX

AIR, GAS AND LIQUID HANDLING

How can we get drier and cleaner compressed air? – Plant system problem July 136
Instrumented control – 16-page special report Oct. 49
Fluid handling automated on small scale. William O'Keefe Oct. 52
1970 Energy Systems Design Survey (charts & tables) Oct. S-1
Equipment and design aids roundup Oct. 168
Tapping into an intake at lake bottom Mar. 78
Viscosity vs temperature for lubricating oils and hydraulic fluids. J.J. Sherlock (Data Sheet) (chart) Mar. 148

Compressors

Air line not integral. L.J. Holman (P.I.) Nov. 161
Conservatively lucky. F. Graham (P.I.) Jan. 136
Eliminating moisture from compressed air – I don't agree. J. Reed. (P.I.) Mar. 150
Engine room air supply – What would *you* have done? L.T. Mullin (P.I.) Feb. 137
How can we get drier and cleaner compressed air? – Plant system problem July 136
Plant adds high-pressure compressors. William O'Keefe (flow-diagram, graph) Mar. 76
Use clock to check compressor status. F.C. Laugheed (P.I.) Aug. 139
Watch that air pressure. J.G. Reed (P.I.) Jan. 136

Filters

Hydraulic "sickness". Steve Elonka (P.I.) Aug. 139

Insulation

Asbestos-insulated steam lines get living space Apr. 47
Reflective insulation around piping. L.D. Tokerud May 63
Should pipe insulation be inspected regularly? – Plant system problem Nov. 156
Special mandrel solves a problem – permits production of thick insulation in single layer Aug. 67

Packing, gaskets and seals

Let vacuum seal a leak. H.M. Spring (P.I.) Mar. 150
Metallic gaskets to the rescue, two cases in point. B. Zetchus (P.I.) May 150
New pump sealing methods supplement old. J.O. Warden Jan. 39
This vacuum seal works. G.D. Pheil (P.I.) July 142
Use a systems approach on packings and mechanical seals for pumps Dec. 88

Piping, accessories

Beware of cryogenic fluids. W. Wolentarski (P.I.) Mar. 150
Bonded graphite slides guard plastic pipe. A.W. Wolff Feb. 50
'Chipless' drilling into nuclear piping. H.C. Bosley May 64
Color coding pipe lines – yes or no? H. Havet (P.I.) Apr. 200
Color-coding: Reader ideas on practice of color-coding plant piping (P.I.) Sept. 166
Color-coding: Use color code – here's why. J.B. Jenkins (P.I.) Dec. 144
Determine pipe-wall thinning in bends. A. Zanker (Data Sheet) (nomograph) Dec. 140
Elimating moisture from compressed air – I don't agree. J. Reed (P.I.) Mar. 150
Fiber-glass-reinforced plastic pipe – a specialist in piping problems. George Balcom July 64
Galvanizing, the pipe protector, can guard supports, tanks, gratings, too. G.B. Moody (table) Feb. 47
How can silt be kept out of intakes? – Plant system problem Apr. 190
How can we keep tape out of piping? – Plant system problem Aug. 134
JFK Airport: more passengers, more piping. William O'Keefe Nov. 40
Leaky servo line threatens shutdown. G.L. Campbell (P.I.) Apr. 198
Natural-gas flow through swaged nipples. D.S. Davis (Data sheet) (nomograph) Apr. 196
New plugs, careful tests assure successful tie-ins Aug. 65
Repairing nuclear-plant piping Jan. 44
Separate lines, check valves for air tanks? – Plant system problem Feb. 128
Stopgap pipe repair. T.A. Stewart (P.I.) Dec. 142
TFE/glass lets 4660-ft steam pipe expand two ways Nov. 41
Why our vacuum didn't build up. V.K. Singhal (P.I.) June 198
World Trade Center – pace-setter for the 70's – 16-page special report Jan. 149
Piping systems feature X-raying, h-p pumps Jan. 162

Pumps

Brass mesh strainer, eliminates pumping problem – What would *you* have done? D. Hennigar (P.I.) Aug. 139
Don't test with air. W.A. Bagwell (P.I.) June 200
Hydrostatic bearings eliminating pump-stability problems. E. Makay July 62
Metering pumps feed precisely, save money. H.A. Black (chart) June 70
New ideas needed for the NPSH problem. W.L. Dornaus June 74
New pump sealing methods supplement old. J.O. Warden Jan. 39
No more scoring in our pumps. P. Zandee (P.I.) Aug. 140
Our pump wouldn't speed up. T.A. Stewart (P.I.) Dec. 144
Quick venting. S. Goshal (P.I.) Aug. 140
A sail saves the day. T.A. Stewart (P.I.) Mar. 152
Use a systems approach on packings and mechanical seals for pumps Dec. 88
Why did we lose vacuum on our pumps? R.N. Bhatnagar (P.I.) Apr. 200
Why our bilge pump was airbound. E. Kaknics (P.I.) Sept. 165
Why our pump slowed down. T.A. Stewart (P.I.) July 141
Wood solves pump repair problem. Would you believe . . . A.J. Kuchinsky (P.I.) Feb. 138

Tanks and pressure vessels

Acid fume scrubber. Q. Minich (P.I.) Dec. 143
Check unfired pressure vessel thickness. A.N. Pathak & M.K. Garg (Data Sheet) (nomograph) Nov. 158
How can we measure and remove water in an oil tank? – Plant system problem Dec. 132
Leaky tank: What would *you* have done? A.J. Kuchinsky (P.I.) Apr. 199

Valves

Automatic recirculation with "leakoff valve". A.M. Ritter (P.I.) Jan. 134
Bad discharge valve. H.L. Ricketts (P.I.) Mar. 152
Don't check, stop. F.R. Haworth (P.I.) Apr. 200
New valves fight cavitation and noise at high pressure. William O'Keefe Sept. 44
PVC for CO_2 valves. C.H. Wong (P.I.) Dec. 143
Separate lines, check valves, for air tanks? – Plant system problem Feb. 128
Swing check valves have new application in core-support shield. R.E. Wascher & G.J. Snyder Apr. 90
Troubled by leaking safety valves? Robert A. Dunlea Jr. (table) Jan. 50
Use manual remote control to move the distant valves. J.P. Dickinson (table) Aug. 66
Valve actuators gain wider use Apr. 48
Why did fuel consumption soar? M.G. Magoulas (P.I.) June 198

Welding

Repairing nuclear-plant piping Jan. 44

ENVIRONMENTAL MANAGEMENT

1970 Energy Systems Design Survey (charts & tables) Oct. S-1
Equipment and design aids roundup Oct. 192
Environmental management in the '70s. (Ed.) Feb. 17
Oil spillage: We keep it clean. T.I. Stafford (P.I.) Nov. 160
Environmental communications: a step ahead (Ed.) Sept. 31
Pollution issue alerts industry to communication problem (Earth Day) June 60
Youth and the problems ahead (Ed.) Jan. 35

Additives

Can additives decrease diesel smoke? Aug. 60
How to evaluate fuel oil additives. V.J. Cotz (chart & table) Feb. 36

Air pollution

Agog about smog. J.R. Reed (P.I.) Dec. 142
At which stage is it best to desulfurize? (chart) Mar. 68
Can additives decrease diesel smoke? Aug. 60
Congress on the trail of pollution standards Mar. 70
District system warms heart of Japanese city. L. Malfitani Apr. 50
Fluidized-bed combustion should reduce air pollution July 46
Hot electrostatic dust collector works better June 60
How to evaluate fuel oil additives. V.J. Cotz (chart & table) Feb. 36
No dust at unit-train unloading station May 32

Dust collectors

Hot electrostatic dust collector works better June 60

Fly ash

Trace fly ash emitters with phosphors Apr. 87

Instrumentation

Instrumented control – 16-page special report Oct. 49
Prime need: instruments for use in field. R.J. Bender Oct. 50
Instrumentation is key to water management. C.P. Blakeley June 58

Noise

'Add-on' quieting for gas turbine. W.J. Pietrucha (charts) May 54
New valves fight cavitation and noise at high pressure. William O'Keefe Sept. 44
Walsh-Healey Act changes spur design-out of noise to protect workers' hearing. Dr. L.L. Beranek (chart & tables) May 52

Radioactivity

BWR requires automated air ejectors and precautions against radioactive emissions Feb. 38
Plants show progress in pollution control. R.G. Schwieger (charts & tables) Apr. 27

Vibration

Resonant vibrations: What would *you* have done; W.E. Tritz (P.I.) Jan. 135

Waste disposal

Are European incinerators setting pace? R.J. Bender Feb. 40
City's prime concern: solid-waste disposal. R.J. Bender Sept. 38
Disposing of nuclear plant solid wastes. P.T. Tuite Nov. 78
How we're waging the battle against solid wastes (chart) Mar. 69
Steam-generating incinerators show gain. R.J. Bender Sept. 35
Waste recovery pays – with sonic burner. E.L. Howell Nov. 75
World Trade Center – pace-setter for the 70's–16-page special report Jan. 149
Mobile compaction, an innovation in waste disposal Jan. 164

Water treatment

Fresh water from condenser heat? H.P. Basford (P.I.) July 142
Yes – but. D. Aronson (P.I.) July 142
Options for cooling large plants in the '70's. T.C. Elliott (table) Dec. 84
Ozonation, next step to water purification. R.J. Bender Aug. 58

HEATING AND COOLING

All-electric high school in Wisconsin will be the largest. R.L. Nailen (chart) Mar. 82
District system warms heart of Japanese city. L. Malfitani Apr. 50
Hancock, John Center in Chicago: Controlling environment on cloud nine June 110
Hospital standards govern environment control in nuclear clean room Dec. 38
Instant equipment selection, a coming trend? T.C. Elliott May 102
Instrumented control – 16-page special report Oct. 49
Tighter control over indoor environment. T.C. Elliott Oct. 56
1970 Energy Systems Design Survey (charts & tables) Oct. S-1
Design features Oct. S-28
Big buildings feature automated control with operation keyed to central panel Oct. S-32
Equipment and design aids roundup Oct. 178
World Trade Center – pace-setter for the 70's – 16-page special report Jan. 149
Peripheral, interior air systems combine to provide comfort conditioning for towers Jan. 158

Air systems

Hospital standards govern environment control in nuclear clean room Dec. 38
Laying out cones for ducts and transitions. L.L. Yost (Data Sheets) (table) May 148
Mixing factor is guide to ventilation. J.D. Constance (chart) Feb. 56
Steps in balancing air systems. J.D. Constance (table) May 65

Air washers

Air washer installation: Inside job put me on the outside. H.T. Livingston (P.I.) Sept. 164

Central plants

All-fuel power comes to Scotland (map) Sept. 48

Evaluate central-plant concepts by computer. Milton Meckler (chart & tables) ... July 67
Hospital's all-fuel plant relies on low-speed diesels. N.L. Cooperider (diagram, table) ... Aug. 68
Japan: Sapporo central high-temperature water system supplying heat to 50-block area, will cut air pollution by more than half. L. Malfitani ... Apr. 50
Texas Medical Center: Central plant provides heating and cooling for vast medical complex ... Feb. 58
Turfland Mall shopping center, Lexington, Ky.: Total-energy pays off when reliability is factored in. Hal Lunde ... Aug. 71
World Trade Center – pace-setter for the 70's – 16-page special report Jan. 149
Two-acre central chiller plant, 68 ft. below ground level, supplies Center's cooling ... Jan. 156

Coils

Find blast-coil temperatures quickly. W. Sisson (Data Sheet) (nomograph) ... Sept. 162

Cooling towers

Let fireflies monitor your cooling water. L.F. Lott (chart) ... Apr. 92
Options for cooling large plants in the 70's. T.C. Elliott (table) ... Dec. 84
Right-angle gear boxes start failing: A delay there never was. W.E. Tritz (P.I.) ... June 200

Fans and blowers

Can I convert an ordinary fan to high-temp service? – Plant system problem ... Apr. 192

Heat exchangers

Heat exchangers – a 16-page special report. R.G. Schwieger (tables) .. June 33
Understanding the basics of heat transfer ... June 34
Feedwater heaters boost cycle efficiency ... June 36
How deaerators remove corrosive gases ... June 39
Condensers help extract maximum energy from steam ... June 40
Shell-and-tube heat exchangers serve other purposes ... June 43
Chilling air involves many heat exchangers ... June 44
A quick glance at chillers and condensers ... June 46
Preparing heat-exchanger specifications ... June 48

Heating systems

Can I use sodium sulfite in an HTW system? – Plant system problem . Dec. 134
District system warms heart of Japanese city. L. Malfitani ... Apr. 50
Homemade tester. D. Pheil (P.I.) ... May 152
Hospital growth demands hot-water planning. W. Batt & J. Persson (table) ... Nov. 39
What sort of heating for combined warehouse and fabrication? – Plant system problem ... May 146

Industrial power plants

Aftercooler leakage – how to correct in a hurry. S. Goshal (P.I.) ... Dec. 142
Desalting seawater with nuclear heat. R.L. Baer ... Mar. 79
Drying system maintains plant air quality ... May 67
Hospital growth demands hot-water planning. W. Batt & J. Persson (table) ... Nov. 39
Hydraulic turbine recovers pumping energy. William O'Keefe ... Apr. 62
JFK Airport: more passengers, more piping. William O'Keefe ... Nov. 40
Valving for heat recovery. S.A. Banyacski & G.E. Johnson ... Nov. 44

Refrigeration

Dairy 'cools it' with two gas engine-driven chillers. Dan Soehnlen ... Nov. 42
Did you mark it? T.A. Stewart (P.I.) .. Sept. 165
How to trouble-shoot your a/c refrigeration. J. Constance (table) .... Sept. 47

Snow removal

Can we remove snow by hot water washing? – Energy system problem ... Jan. 124C
How to design a plant snow-melting system ... Dec. 37

INSTRUMENTATION AND CONTROL

1970 Equipment and Design Aids Roundup ... Oct. 238
Alarm monitors chemical feed. T.I. Stafford Jr. (P.I.) ... Mar. 152
Analyze transformer gas to identify faults. K. Lindemann ... Apr. 74
Analyzers: For top engine performance, use three-way analyzer ... Nov. 63
Be careful when changing trend charts. J. Kortekamp (P.I.) ... Nov. 160
How can we check bearing temperature? – Energy system problem ... Jan. 124A
Instrumented control – 16-page special report ... Oct. 49
Prime need: instruments for use in field. R.J. Bender ... Oct. 50
Fluid handling automates on small scale. William O'Keefe ... Oct. 52
Boiler load determines control philosophy. R.G. Schwieger ... Oct. 54
Tighter control over indoor environment. T.C. Elliott ... Oct. 56
Instruments guide system performance. Norman Peach ... Oct. 58
Controls advance for increased automation. R.G. Schwieger ... Oct. 60
Computers enter age of refinement. T.C. Elliott ... Oct. 62
Controlling lubricant flow ... Oct. 64
Metering pumps feed precisely, save money. H.A. Black (chart) ... June 70
Natural-gas flow through swaged nipples. D.S. Davis (Data Sheet) (nomograph) ... Apr. 196
A switch to watch when troubles arise. M.G. Magoulas (P.I.) ... May 150

Boilers

Boiler and burner control – a glossary of terms. R.C. Flanagin (Data Sheets) Part 1 ... Jan. 82
Part 2 ... Feb. 132
Boiler load determines control philosophy. R.G. Schwieger ... Oct. 54
Full automation helps boost boiler efficiency (chart) ... Nov. 64
Glass air heaters pay dividends ... Aug. 55
Limit switches: What would *you* have done? C.E. Rose (P.I.) ... Sept. 165

Central power stations

Combustion-gas detectors aid automation ... Apr. 86
Louisiana Power & Light turns to supervisory control ... Apr. 89
Stuart, J.M., Electric Generating Station: Control-room layout key to top operation. I.I. Siegel (charts) Mar. 55

Computers

Computer manufacturers eye needs of "little guy" ... Dec. 71
Control reactor with a process computer. H.H. Hendon & others ... Aug. 48
Instant equipment selection, a coming trend? T.C. Elliott ... May 102
Los Angeles' hospital project: Evaluate central-plant concepts by computer. Milton Meckler (chart & tables) ... July 67
Process computer with plug-in growth built in modules ... Apr. 88
Utility survey pinpoints computer usage. J.W. Lamont & J.R. Tudor (tables) ... Sept. 72
Vepco safeguards for computer when floods threaten ... May 100

Control valves

Here's lowdown on check valve in air line. J.B. Shearer (P.I.) ... Feb. 136
Those check valves ... K. Ackland (P.I.) ... Feb. 138
New valves fight cavitation and noise at high pressure. William O'Keefe .. Sept. 44
Use manual remote control to move the distant valves. J.P. Dickinson (table) ... Aug. 66
Valving for heat recovery. S.A. Banyacski & G.E. Johnson ... Nov. 44

Industrial power plants

A case for boiler conversion. R.W. Marshall ... Aug. 47
Fuel-oil temperature is controlled automatically. M.G. Magoulas (P.I.) .. Aug. 138
Full automation helps boost boiler efficiency – Sun Oil Co's Marcus Hook refinery (chart) ... Nov. 64
Hancock, John, Center in Chicago: Controlling environment on cloud nine ... June 110
How meter system monitors lube oil. H.E. Alhart ... Nov. 61
How to use ct's for field measurements. R.C. Davey (chart) ... Apr. 71
Instrumentation is key to water management. C.P. Blakeley ... June 58
Is your flame scanner color blind? M.G. Margoulas (P.I.) ... Jan. 135
Let fireflies monitor your cooling water. L.F. Lott (chart) ... Apr. 92
Link remote sensors to central console with coaxial cables, leased telephone lines ... July 28
New methods for slow crane-load spotting. William O'Keefe ... Feb. 63
1970 Energy Systems Design Survey (charts & tables) ... Oct. S-1
Trends in temperature sensing and measurement. T.C. Elliott ... Feb. 21
Thermocouples: Workhorses that still work hard in a broad range of temperature-measuring applications (table) ... Feb. 22
Platinum RTDs challenge the leader, thermistors display potential in areas now dominated by thermocouples ... Feb. 24
Special sensors for special applications ... Feb. 25
World Trade Center – pace-setter for the 70's – 16-page special report .. Jan. 149
Centralized alarm system is major anti-fire tool ... Jan. 160
Building systems are controlled centrally ... Jan. 161

Nuclear

Pt RTD's – What are they? Who needs them? Where are they going in systems control? Ernst Umrath (table) ... June 106
Other views on platinum RTDs .... Nov. 65
Understand nuclear instrumentation terms ... Mar. 58

MECHANICAL TRANSMISSION AND LUBRICATION

1970 Energy Systems Design Survey (charts & tables) ... Oct. S-1
Equipment and design aids roundup .. Oct. 250

Bearings

Basic research stretches bearing life. William O'Keefe ... June 102
Bearing and gear performance a problem? Fresh look at basics gives some answers. J.J. O'Connor .... Mar. 53
Bearing protection. D.C. Calhoun (P.I.) Apr. 199
Did you know ... (P.I.) ... Feb. 138
How can we check bearing temperature? – Energy system problem . Jan. 124A
Hydrostatic bearings eliminating pump-stability problems. E. Makay ... July 62
Scrape that bearing. T.A. Stewart (P.I.) Aug. 138

Couplings

Control speed with eddy-current couplings. Norman Peach ... Apr. 78
Electric coupling aids acceleration. Norman Peach ... Feb. 74
Metallic flexible couplings progress steadily – but ... W. O'Keefe .... Dec. 70

Drives

Breaking drive chains; lube-pump drive trips – solve one, cause another I.H. Shah (P.I.) ... Nov. 162
Ingenuity will help you align roller-chain sprockets. William O'Keefe Apr. 80
Measuring drive backlash and flexibility. William O'Keefe (chart) .. Mar. 51
Multiple drive mixes coal slurry ... Nov. 62
Oil-cooled slippage highlights new drives. William O'Keefe ... July 26
Take account of reflected inertia in high-ratio drives ... May 98
V-belt drive capacities head upward again (table) ... Aug. 45

Gears

Bearing and gear performance a problem? Fresh look at basics gives some answers. J.J. O'Connor .... Mar. 53
Breaking gear chains: solve one problem, cause another. I.H. Shah (P.I.) ... Nov. 162
Higher gear accuracy cuts noise and wear (table) ... Aug. 46
How to keep a gear reducer out of trouble. R.V. Chirstgau ... June 104

Lubrication

Dehydrate lube oil in vacuum chamber. L.B. Baranowski ... Sept. 74
How meter system monitors lube oil. H.E. Alhart ... Nov. 61
Instrumented control – 16-page special report ... Oct. 49
Controlling lubricant flow ... Oct. 64
Lube system with synthetic FR fluid promises higher reliability. J.J. O'Connor ... May 96
Oil roller chain properly ... May 99
Process-fluid lubrication faces harsh realities ... Dec. 69
Reliable lubrication a must for large motors. R.L. Nailen ... Feb. 76
Solid lubricants fight higher temperatures (chart) ... Apr. 77
Viscosity vs temperature for lubricating oils and hydraulic fluids. J.J. Sherlock (Data Sheet) (chart) ... Mar. 148
Would you believe: northern outdoor plant? W.R. Harding (P.I.) ... Nov. 162

PLANT ELECTRIC SYSTEMS

1970 Equipment and Design Aids Roundup ... Oct. 186
Summer threat and your electrical system (Editorial) ... July 13

Batteries

New batteries use zinc-air couple. Norman Peach ... Aug. 44
New storage battery promises longer life ... Feb. 73

Cable

Cable installation when conduit is covered – What would *you* have done? R.L. Serrano (P.I.) ... Mar. 151
Electric distribution in today's plants. Norman Peach ... Mar. 23
Cable designs seek reliability, efficiency ... Mar. 24
Cable termination has been simplified ... Mar. 26
Cable requires support and protection ... Mar. 27
Busways simplify secondary distribution ... Mar. 28
Short-circuit currents for insulated aluminum cables. W. Sisson (Data Sheet) (nomograph) ... July 138
Short-circuit currents for insulated copper cables. W. Sisson (Data Sheet) (nomograph) ... June 196
Wire cross sections for power distribution. P. Gheorghiu (Data Sheet) (nomograph) ... Aug. 136

Circuit breakers

All-purpose vacuum seal. G.D. Pheil (P.I.) ... July 140
Vacuum interrupters come of age. Norman Peach ... July 17
Metalclad switchgear is made smaller, lighter, quieter ... July 20
Vacuum units are suited to deep-well pumping, URD ... July 22

Electric distribution

Electric distribution in today's plants. Norman Peach ... Mar. 23
Cable designs seek reliability, efficiency ... Mar. 24
Cable termination has been simplified ... Mar. 26
Cable requires support and protection ... Mar. 27
Busways simplify secondary distribution ... Mar. 28
Ground your electric system with care. L.M. Applegate ... Aug. 42
Grounding of electric systems ... letter to POWER from E.A. Wismer ... Aug. 43
How can we eliminate radio interference? – Plant system problem ... Sept. 160
How can we get ground connection without using piping? – Plant system problem ... Mar. 144
How safe are electrical systems? (Ed.) ... Mar. 19
How to use symmetrical components. Irwin Lazar (table) ... Feb. 70
1970 Energy Systems Design Survey (charts & tables) ... Oct. S-1
Reliability and flexibility are key factors in electric system design ... Oct. S-22
Design features ... Oct. S-24
World Trade Center – pace-setter for the 70's ... Jan. 149
Electricity: lifeblood of World Trade Center ... Jan. 152

Electric energy

Do you understand demand charges? Norman Peach (charts & tables) ... Sept. 56
Electric demand can be controlled. Norman Peach (chart) ... Nov. 58
Energy in switching surges. B.G. Waurick ... Dec. 39

Furnaces

Arc furnaces represent unique loads. Norman Peach ... May 83

Fuses

Protect rectifiers with isolating fuses. C. J. Bellace and E. H. Bogert (charts) ... Sept. 58

Lighting

Now lights last longer. C.H. Milster Jr. (P.I.) ... Nov. 162

Maintenance

Prolong the life of your electric equipment. W.G. Polkinghorne (charts) ... June 93

Motors, starters, controls

Calculate motor-starting voltage drop. Irwin Lazar ... May 80
Control speed with eddy-current couplings. Norman Peach ... Apr. 78
Induction motor starter troubles: What would *you* have done? S. Martinez (P.I.) ... June 199
Intrumented control – 16-page special report ... Oct. 49
Plant electric systems: Instruments guide system performance. Norman Peach ... Oct. 58
Linear motors have practical applications ... Norman Peach ... June 96
... Coal transportation is a case in point. R.J. Bender ... June 97
Our 'heavenly' overload protection. I.H. Shah (P.I.) ... June 198
Protect motor-driven machines from overloads. H.F. Gingrich ... Apr. 76
Reactor coolant pumps get premium motors. C.E. Pastor ... Dec. 40
Reliable lubrication a must for large motors. R.L. Nailen ... Feb. 76
Update power-plant motor applications. C.E. Pastor (charts & table) ... May 77

Transformers

Analyze transformer gas to identify faults. K. Lindemann ... Apr. 74
How to use ct's for field measurements. R.C. Davey (chart) ... Apr. 71
Wire for transformer: What would *you* have done? G. Rosekilly (P.I.) ... Dec. 143

PRIME MOVERS AND ELECTRIC GENERATION

1970 Energy Systems Design Survey (charts & tables) ... Oct. S-1
Engines yield more standby and peaking power; total-energy gains in U.S. ... Oct. S-8
Design features (engines) ... Oct. S-10
Popularity of gas turbines continues to climb ... Oct. S-13
Design features (gas turbines) ... Oct. S-14
Why so few turbine generators? ... Oct. S-16
Design features ... Oct. S-16
Equipment and design aids roundup ... Oct. 222

Batteries

New batteries use zinc-air couple. Norman Peach ... Aug. 44

Central power stations

Con Edison's Ravenswood No. 3: 'Big Allis' downed by stator vibration. J. J. O'Connor ... Sept. 62
Stuart, J. M., Electric Generating Station: Control-room layout key to top operation. I. I. Siegel (charts) Mar. 55
Vepco safeguards for computer when floods threaten ... May 100

Condensers

BWR requires automatic air ejectors and precautions against radioactive emissions ... Feb. 38
Let fireflies monitor your cooling water. L. F. Lott (chart) ... Apr. 92
Making steam ejectors work in processes. R. Ward (P.I.) ... Nov. 160
Public Service Electric and Gas Co's Linden, N. J. Plant: Reduce condenser corrosion. H. G. Fry ... Sept. 46

Engines

For top engine performance, use three-way analyzer ... Nov. 63
Dairy 'cools it' with two gas engine-driven chillers. Dan Soehnlen ... Nov. 42
How reliable are today's prime movers? R. W. Parisian (tables) ... Jan. 45
Making final engine-system alignment. G. D. Pheil ... July 32
Overheating? Check clearances. W. R. Pender (P.I.) ... Nov. 161
Standardize diesel preventive maintenance. P. D. Johnson ... Sept. 60
What caused this crankcase explosion? – Plant system problem ... June 194
St. Elizabeth Hospital, Lincoln, Neb.: Hospital's all-fuel plant relies on low-speed diesels. N. L. Cooperider (diagram, table) ... Aug. 68

A three-legged line. H. T. Livingston (P.I.) ... May 151
Trends in large-generator design. Norman Peach ... June 85
Turbogenerators push past 1000 MW in U.S. and Russia ... Mar. 94

Industrial power plants

How to weigh on-site generation when designing a new industrial plant. S. L. Geiringer (charts) ... Feb. 33
Lube system with synthetic fluid promises higher reliability. J.J. O'Connor ... May 96
Scotland: Singer Co's Clydebank factory is total-energy plant (map) ... Sept. 48

Motors

Reactor coolant pumps get premium motors. C. E. Pastor ... Dec. 40

Turbines, gas

'Add-on' quieting for gas turbine. W. J. Pietrucha (charts) ... May 54
Contannt-pressure compressed-air storage extends peak periods for gas turbine. S. D. Kalapasev (flow-diagram, charts) ... Mar. 90
Gas turbine rotors replacement. H. Havet (P.I.) ... Mar. 151
How reliable are today's prime movers? R. W. Parisian (tables) ... Jan. 45
Instrumented control – 16-page special report ... Oct. 49
Controls advance for increased automation. R.G. Schwieger ... Oct. 60
Steam injection can improve gas turbines. B. G. Ediss (charts) ... June 82

Turbines, hydraulic

Canada: Churchill Falls – huge hydro project surging forward ... Nov. 57
Hydraulic turbine recovers pumping energy for New York's Presbyterian Hospital. William O'Keefe ... Apr. 62

Turbines, steam

Aligning a four-bearing turbine-generator. P. J. Hoppe (chart) ... Feb. 60
Instrumented control – 16-page special report ... Oct. 49
Controls advance for increased automation. R. G. Schwieger ... Oct. 60
A new dimension for in-plant generation – radial-flow steam turbine. R. J. Bender ... Apr. 59
On-line examination reduces turbine outage. Lars Elmenius (chart) ... Nov. 56
Steam turbines climb in size. R. G. Schwieger (chart & table) ... Aug. 31
Steel foundations are becoming popular for steam turbines. Dr. I. H. Dietz ... May 68
Stop-valve opening: Easy does it. B. Zetchus (P.I.) ... July 140
Turbines gaining as auxiliary drives. M. F. Pierpoline ... July 30
Turbogenerators push past 1000 MW in U. S. and Russia ... Mar. 94
Wet steam escalates turbine outage rate. R. G. Schwieger ... Dec. 42

STEAM GENERATION

Fluidized-bed combustion should reduce air pollution ... July 46
Heat exchangers – a 16-page special report. R.G. Schwieger (tables) (see HEATING AND COOLING) ... June 33
Hospital's all-fuel plant relies on low-speed diesels. N. L. Cooperider (diagram, table) ... Aug. 68
How can silt be kept out of intakes? – Plant system problem ... Apr. 190
How to weigh on-site generation when designing a new industrial plant. S. L. Geiringer (charts) ... Feb. 33
New plugs, careful tests assure successful tie-ins ... Aug. 65
1970 Energy Systems Design Survey (charts & tables) ... Oct. S-1
Fossil-fueled central stations: Orders for new units grow, but where will the fuel come from? ... Oct. S-2
Design features (central stations) Oct. S-4
Survey reflects improved boiler market ... Oct. S-17
Design features (industrial steam) Oct. S-18
Equipment and design aids roundup ... Oct. 230
Options for cooling large plants in the 70's. T. C. Elliott (table) ... Dec. 84
Simplify power-plant cost calculations. R. T. Anderson (nomograph) ... July 39
Steam-generating incinerators show gain. R. J. Bender ... Sept. 35
Tapping into an intake at lake bottom ... Mar. 78
What stopped the stop valve? G. L. Campbell (P.I.) ... Apr. 198

Boilers

Don't be outbaffled. T. A. Stewart (P.I.) ... June 199
Boiler and burner control – a glossary of terms. R. C. Flanagin (Data Sheets) Part 1 ... Jan. 82
Part 2 ... Feb. 132
Boiler load determines control philosophy. R. G. Schwieger ... Oct. 54
Can we install a small industrial boiler outdoors? – Plant system problem ... July 134
A case for boiler conversion. R.W. Marshall ... Aug. 47
Combustible-gas detectors aid automation ... Apr. 86
Epoxy to the rescue. C. H. Milster Jr. (P.I.) ... Dec. 142
Full automation helps boost boiler efficiency (chart) ... Nov. 64
Glass air heaters pay dividends ... Aug. 55
How practical is boiler rental? ... Mar. 64
How to evaluate fuel oil additives. V. J. Cotz (chart & table) ... Feb. 36

Key questions and answers on boiler safety ... Sept. 70
Limit switches: What you *you* have done C. E. Rose (P.I.) ... Sept. 165
Quick-start systems make peaking efficient. Herbert Berger (chart) ... July 42
Supercritical boiler units, now in their third generation, gain tighter grip. R. J. Bender (charts & table) ... May 30
A 3-point boiler safety plan (Ed.) ... Apr. 23
Total boiler safety. L. J. Holman (P.I.) May 151
U.S. welcomes variable-pressure concept. R. J. Bender ... Aug. 56

Condensers

Reduce condenser corrosion. H. G. Fry Sept. 46

Fans

Can I convert an ordinary fan to high-temp service? – Plant system problem ... Apr. 192

Feedwater

Continuous demineralization pays dividends. S. Pauls and S. Seth (flowsheet) ... Nov. 76
Fresh water from condenser heat? H. P. Basford (P.I.) ... July 142
Yes – but. D. Aronson (P.I.) ... July 142
Historic ion exchanger sparks growing interest in mixed-bed demineralization. I.B. Dick & W. S. Morrison Jan. 48

Fuels

Alaskan gas goes to Japan ... Mar. 66
At which stage is it best to desulfurize? (chart) ... Mar. 68
Firing crude oil in boilers (chart & table) ... Spet. 69
Fuels: What's ahead? T. C. Elliott & R. G. Schwieger ... Dec. 81
Making the unit train more effective .. Feb. 37
Multiple drive mixes coal slurry ... Nov. 62
Nuclear explosives, geothermal energy seek partnership ... May 71
Power in a trillion-dollar economy (Ed.) ... Dec. 33
Why did fuel consumption soar? M. G. Magoulas (P.I.) ... June 198

Furnaces and burners

Aircones for fuel oil burners: What would *you* have done? T. A. Stewart (P.I.) ... Nov. 161
Furnace problems? Not with more brick. V. Kumar (P.I.) ... Sept. 164
Grate area increased to hold more lignite: What would *you* have done: M. L. Williams ... May 151
How modern burners match their jobs. (table) ... Mar. 65
Relining by spraying. W. R. Pender (P.I.) ... Jan. 136

Nuclear

BWR requires automated air ejectors and precautions against radioactive emissions ... Feb. 38
Charting the startup of a nuclear plant. R. O. Brugge (chart & table) ... May 25
'Chipless' drilling into nuclear piping. H. C. Bosley ... May 64
Control reactor with a process computer. H. H. Hendon & others ... Aug. 48
Disposing of nuclear plant solid wastes. P. T. Tuite ... Nov. 78
Italy scales up nuclear capability. Prof. A. M. Angelini (table) ... Mar. 67
Nuclear explosives, geothermal energy seek partnership ... May 71
Nuclear notes. R. J. Bender ... Jan. 76
Plants show progress in pollution control. R.G. Schweiger (charts & tables) ... Apr. 27
Pt RTD's – What are they? Who need them? Where are they going in systems control? Ernst Umrath (table) ... June 106
Other views on platinum RTDs ... Nov. 65
Reactor coolant pumps get premium motors. C. E. Pastor ... Dec. 40
Repairing nuclear-plant piping ... Jan. 44
SURFSIDE: Desalting seawater with nuclear heat. R. L. Baer ... Mar. 79
Swing check valves have new application. R.E. Wascher and G.J. Snyder ... Apr. 90
Troubled by leaking safety valves? Robert A. Dunlea Jr. (table) ... Jan. 50
Turbogenerators push past 1000 MW in U. S. and Russia ... Mar. 94
Understand nuclear instrumentation terms ... Mar. 58
Waste recovery pays – with sonic burner. E. L. Howell ... Nov. 75
ZPPR hastens fast-breeder development Mar. 66

SYSTEMS-WIDE

Data Sheets (A Dept.)

Boiler and burner control – a glossary of terms. R.D. Flanagin (Data Sheets) Part 1 ... Jan. 82
Part 2 ... Feb. 132
Check unfired pressure vessel thickness. A. H. Pathak & M. K. Garg (nomograph) ... Nov. 158
Determine pipe-wall thinning in bends. A. Zanker (nomograph) ... Dec. 140
Find blast-coil temperatures quickly. W. Sisson ... Sept. 162
Laying out cones for ducts and transitions. L. L. Yost (table) ... May 148
Natural-gas flow through swaged nipples. D.S. Davis (nomograph) ... Apr. 196
Short-circuit currents for insulated aluminum cables. W. Sisson (nomograph) ... July 138
Short-circuit currents for insulated copper cables. W. Sisson (nomograph) ... June 196
Viscosity vs temperature for lubricating oils and hydraulic fluids. J. J. Sherlock (chart) ... Mar. 148
Wire cross sections for power distribution. P. Gheorghiu (nomograph) . Aug. 136

Power's history

POWER was founded in 1884 by E P Harris and H M Swetland. With it was incorporated *Steam* which had been started in Chicago two years earlier.

In 1903 POWER purchased and absorbed *Science and Industry*, which was a consolidation of a number of periodicals: *Home Study Magazine, Home Study for Machinists, Mechanic's Magazine, Home Study for Building Trades, Building Trade's Magazine, Home Study for Electrical Workers, Steam Electric Magazine.*

In 1908 POWER absorbed *The Engineer's Review*, of Cleveland, and *The Engineer*, of Chicago, the latter being a consolidation of *The Safety Valve, Lord's Power and Machinery Magazine, The Stationary Engineer, Steam Engineering* and *The Mechanical Engineer*. When the *Engineer* was purchased, the name of the combined magazine was *Power and the Engineer*. The title was condensed to POWER in 1911. In 1951 POWER absorbed *Operating Engineer*.

All rights to above titles reserved.

Power energy systems design reports

Here's important help for you in many areas of design, measuring, control, operation, etc., compiled from reports originally published in **Power** and bound in convenient form. If you could purchase the separate reports (many are out of print) it would cost much more than the modest price of $4.55. Here's the combination of reports this 124-page volume brings you in the area of plant mechanical and electrical systems:

- Underground Piping Systems
- Compressing Air
- Control Actuators
- Air Conditioning Control
- Pumps
- Air Cooled Heat Exchangers
- Filtration (Liquid)
- Air & Gas Filtration
- Managed Lubrication
- Pumped Storage Hydro
- Process Measuring
- Analyze Power Transients
- Cryogenics
- Coal Handling Advances
- Firm Power Supplies
- Industrial Waste Treatment

USE THIS COUPON TO ORDER

Power, Reader Service Department
330 West 42nd Street
New York, N.Y. 10036

Please send me_____copies of "Energy System Design Reports" as described above.

Enclosed is check for $_____ (Discount on orders of 10 or more.)
